

# Food's Water Footprint: Research Cards

## Instructions

Make one copy of this sheet and cut out the cards. Then divide the class into four groups and give each group one card to research.

<p>Lessons for Understanding Our Water Footprint</p>  <p>RESEARCH TOPIC: <b>Food and Agriculture's Big Water Footprint</b></p> <p>© 2019 GRACE Communications Foundation.</p>	<p>A good resource to start with is: <a href="https://www.watercalculator.org/water-use/#food">https://www.watercalculator.org/water-use/#food</a></p>
<p>Lessons for Understanding Our Water Footprint</p>  <p>RESEARCH TOPIC: <b>Blue, Green, and Grey Water Footprints and Agriculture</b></p> <p>© 2019 GRACE Communications Foundation.</p>	<p>A good resource to start with is: <a href="https://www.watercalculator.org/water-use/#food">https://www.watercalculator.org/water-use/#food</a></p>
<p>Lessons for Understanding Our Water Footprint</p>  <p>RESEARCH TOPIC: <b>Food, Portion Size, Water Footprints, and Sustainable Eating</b></p> <p>© 2019 GRACE Communications Foundation.</p>	<p>A good resource to start with is: <a href="https://www.watercalculator.org/water-use/#food">https://www.watercalculator.org/water-use/#food</a></p>
<p>Lessons for Understanding Our Water Footprint</p>  <p>RESEARCH TOPIC: <b>How Sustainable Farming Can Reduce Water Footprints</b></p> <p>© 2019 GRACE Communications Foundation.</p>	<p>A good resource to start with is: <a href="https://www.watercalculator.org/water-use/#food">https://www.watercalculator.org/water-use/#food</a></p>
